

Publications In Journals

- [1] E. Best, J. Desel, and J. Esparza. Traps characterise home states in free choice systems. *Theoretical Computer Science*, 101:161–176, 1992.
- [2] E. Best, R. Devillers, A. Kiehn, and L. Pomello. Concurrent bisimulations in Petri nets. *Acta Informatica*, 28:231–264, 1991.
- [3] A. Bouajjani, J. Esparza, A. Finkel, O. Maler, P. Rossmanith, B. Willems, and P. Wolper. An efficient automata approach to some problems on context-free grammars. *Information Processing Letters*, 74(5–6):221–227, 2000.
- [4] G. Boudol, I. Castellani, M. Hennessy, and A. Kiehn. Observing localities. *Theoretical Computer Science*, 114:31–61, 1993.
- [5] G. Boudol, I. Castellani, M. Hennessy, and A. Kiehn. A theory of processes with localities. *Formal Aspects of Computation*, 6:165–200, 1994.
- [6] O. Burkart and J. Esparza. More infinite results. *Electronic Notes in Theoretical Computer Science*, 6, 1996.
- [7] O. Burkart and J. Esparza. More infinite results. *Bulletin of the EATCS 62 (Concurrency Column)*, 1997.
- [8] A. Cheng, J. Esparza, and J. Palsberg. Complexity results for 1-safe nets. *Theoretical Computer Science*, 147:117–136, 1995.
- [9] A. Cruz, J. Esparza, and J. Sesma. Zeros of the hankel function of real order out of the principal riemann sheet. *Journal of Computational und Applied Mathematics*, 37:89–99, 1991.
- [10] C. Damm, M. Holzer, and P. Rossmanith. Expressing uniformity via oracles. *Theory of Computer Systems*, 30:355–366, 1997.
- [11] J. Desel and J. Esparza. Reachability in cyclic extended free-choice systems. *Theoretical Computer Science*, 114:93–118, 1993.
- [12] J. Desel and J. Esparza. Shortest paths in reachability graphs. *Journal of Computer and System Sciences*, 51(2):314–323, 1995.

- [13] J. Desel, K.-P. Neuendorf, and M.-D. Radola. Proving non-reachability by modulo-place-invariants. *Theoretical Computer Science*, 153(1), 1996.
- [14] T. Erlebach, P. Rossmanith, H. Stadtherr, A. Steger, and T. Zeugmann. Learning one-variable pattern languages very efficiently on average, in parallel, and by asking queries. *Theoretical Computer Science*, 261:119–156, 2001.
- [15] J. Esparza. A solution to the covering problem for 1-bounded conflict-free petrinets using linear programming. *Information Processing Letters*, 41:313–319, 1992.
- [16] J. Esparza. Model checking using net unfoldings. *Science of Computer Programming*, 23:151–195, 1994.
- [17] J. Esparza. Reduction and synthesis of live and bounded free choice Petri nets. *Information and Computation*, 114(1):50–87, 1994.
- [18] J. Esparza. Decidability of model-checking for infinite-state concurrent systems. *Acta Informatica*, 34:85–107, 1997.
- [19] J. Esparza. Petri nets, commutative context-free grammars, and basic parallel processes. *Fundamenta Informaticae*, 31:13–26, 1997.
- [20] J. Esparza. Reachability in live and safe free-choice Petri nets is *NP*-complete. *Theoretical Computer Science*, 198(1–2):211–224, 1998.
- [21] J. Esparza and G. Bruns. Trapping mutual exclusion in the box calculus. *Theoretical Computer Science*, 153(1):95–128, 1996.
- [22] J. Esparza, J.L. Lopez, and J. Sesma. Zeros of the Whittaker function associated to Coulomb waves. *IMA Journal of Applied Mathematics*, 63(1):71–88, 1999.
- [23] J. Esparza and S. Melzer. Verification of safety properties using integer programming: Beyond the state equation. *Formal Methods in System Design*, 16:159–189, 2000.
- [24] J. Esparza and M. Nielsen. Decidability issues for Petri nets - a survey. *Journal of Informatik Processing and Cybernetics*, 30(3):143–160, 1994.

- [25] J. Esparza, S. Römer, and W. Vogler. An improvement of McMillan's unfolding algorithm. *Formal Methods in System Design*, 2001. To appear.
- [26] J. Esparza, P. Rossmanith, and S. Schwoon. A uniform framework for problems on context-free grammars. *EATCS Bulletin*, 72:169–177, October 2000.
- [27] J. Esparza and C. Schröter. *Fundamenta Informaticae*, 2002.
- [28] J. Esparza and M. Silva. A polynomial time algorithm to decide liveness of bounded free choice nets. *Theoretical Computer Science*, 102:185–205, 1992.
- [29] M. Holzer and P. Rossmanith. A simpler grammar for Fibonacci numbers. *The Fibonacci Quarterly*, 34(5):465–466, November 1996.
- [30] P. Jančar, J. Esparza, and F. Moller. Petri nets and regular behaviours. *Journal of Computer and System Sciences*, 59(3):476–503, 1999.
- [31] A. Kiehn. On the interrelation between synchronized and non-synchronized behaviour of Petri nets. *Journal of Information Processing and Cybernetics EIK*, 24(1/2):3–18, 1988.
- [32] A. Kiehn. Comparing locality and causality based equivalences. *Acta Informatica*, 31:697–718, 1994.
- [33] A. Kiehn and M. Hennessy. On the decidability of non-interleaving process equivalences. *Fundamenta Informaticae*, 30:23–43, 1997.
- [34] B. König. Hypergraph construction and its application to the static analysis of concurrent systems. *Mathematical Structures in Computer Science*, 12:149–175, 2002.
- [35] M. Kunde, R. Niedermeier, K. Reinhardt, and P. Rossmanith. Optimal deterministic sorting and routing on grids and tori with diagonals. *Algorithmica*, (25):438–458, 1999.
- [36] A. Kučera. On finite representations of infinite-state behaviours. *Information Processing Letters*, 70(1):23–30, 1999.

- [37] R. Mayr. Process rewrite systems. *Electronic Notes in Theoretical Computer Science (ENTCS)*, 7, 1997. Proceedings of Expressiveness in Concurrency (EXPRESS'97).
- [38] R. Mayr and T. Nipkow. Higher-order rewrite systems and their confluence. *Theoretical Computer Science*, 192:3–29, 1998.
- [39] R. Niedermeier and P. Rossmanith. On optimal OROW-PRAM algorithms for computing recursively defined functions. *Parallel Processing Letters*, 5(2):299–309, June 1995.
- [40] R. Niedermeier and P. Rossmanith. Unambiguous auxiliary pushdown automata and semi-unbounded fan-in circuits. *Information and Computation*, 118(2):227–245, May 1995.
- [41] R. Niedermeier and P. Rossmanith. Unambiguous computations and locally definable acceptance types. *Theoretical Computer Science*, (194):137–161, 1998.
- [42] R. Niedermeier and P. Rossmanith. A general method to speed up fixed-parameter-tractable algorithms. *Information Processing Letters*, 73(3–4):125–129, 2000.
- [43] R. Niedermeier and P. Rossmanith. New upper bounds for maximum satisfiability. *Journal of Algorithms*, 36:63–88, 2000.
- [44] R. Niedermeier and P. Rossmanith. An efficient fixed parameter algorithm for 3-hitting set. *Journal of Discrete Algorithms*, 2001. To appear.
- [45] P. Rossmanith and W. Rytter. Observations on $\log n$ time parallel recognition of unambiguous context-free languages. *Information Processing Letters*, 44:267–272, 1992.
- [46] P. Rossmanith and T. Zeugmann. Stochastic finite learning of the pattern languages. *Machine Learning*, 44(1/2):67–91, 2001.
