

## Publications: *Higher Order Languages And Mobility*

- [1] B. König. *Description and Verification of Mobile Processes with Graph Rewriting Techniques*. PhD thesis, Technische Universität München, 1999.
- [2] B. König. Generating type systems for process graphs. In *Proc. of CONCUR '99*, number 1664 in Lecture Notes in Computer Science, pages 352–367. Springer-Verlag, 1999.
- [3] B. König. Analysing input/output-capabilities of mobile processes with a generic type system. In U. Montanari, J. D. P. Rolim, and E. Welzl, editors, *Proceedings of the 27th International Conference on Automata, Languages, and Programming*, number 1853 in Lecture Notes in Computer Science, pages 403–414. Springer-Verlag, July 2000.
- [4] B. König. Analysing input/output-capabilities of mobile processes with a generic type system (extended version). Technical Report TUM-I0009, Technische Universität München, 2000.
- [5] B. König. A general framework for types in graph rewriting. In *Proc. of FST TCS 2000*, number 1974 in Lecture Notes in Computer Science, pages 373–384. Springer-Verlag, 2000.
- [6] B. König. A general framework for types in graph rewriting. Technical Report TUM-I0014, Technische Universität München, 2000.
- [7] B. König. A graph rewriting semantics for the polyadic pi-calculus. In *Workshop on Graph Transformation and Visual Modeling Techniques, Proc. of ICALP Workshops 2000*, pages 451–458. Carleton Scientific, 2000.
- [8] B. König. A graph rewriting semantics for the polyadic pi-calculus (extended version). extended version of [Koe00d], 2000.
- [9] B. König. Hypergraph construction and its application to the compositional modelling of concurrency. In *Proc. of GRATRA 2000: Joint*

*APPLIGRAPH/GETGRATS Workshop on Graph Transformation Systems*, 2000.

- [10] B. König. Hypergraph construction and its application to the compositional modelling of concurrency (extended version). Technical Report TUM-I0003, Technische Universität München, 2000.
- [11] B. König. Hypergraph construction and its application to the static analysis of concurrent systems. *Mathematical Structures in Computer Science*, 12:149–175, 2002.
- [12] B. König and U. Montanari. Observational equivalence for synchronized graph rewriting with mobility. In *Proc. of TACS '01*, number 2215 in Lecture Notes in Computer Science, pages 145–164. Springer-Verlag, 2001.
- [13] C. Röckl. First-order proofs for higher-order languages. In *Proc. of FBT'99*, pages 193–202. Utz, 1999.
- [14] C. Röckl and D. Sangiorgi. A  $\pi$ -calculus process semantics of concurrent idealised ALGOL. In *Proc. of FOSSACS'99*, number 1578 in Lecture Notes in Computer Science, pages 306–321. Springer-Verlag, 1999.
