

Publications: *Specification and Verification of Concurrent Systems*

- [1] P. Baldan, A. Corradini, and B. König. A static analysis technique for graph transformation systems. In *Proc. of CONCUR '01*, number 2154 in Lecture Notes in Computer Science, pages 381–395. Springer-Verlag, 2001.
- [2] P. Baldan, A. Corradini, and B. König. Static analysis of distributed systems with mobility specified by graph grammars—a case study. In H. Ehrig, B. Krämer, and A. Ertas, editors, *Proc. of IDPT '02 (Sixth International Conference on Integrated Design & Process Technology)*. Society for Design and Process Science, 2002.
- [3] P. Baldan and B. König. Approximating the behaviour of graph transformation systems. In *Proc. of ICGT '02 (International Conference on Graph Transformation)*. Springer-Verlag, 2002. to appear.
- [4] A. Bouajjani, J. Esparza, and O. Maler. Reachability analysis of push-down automata: Application to model-checking. In *Proc. of CONCUR'97*, 1997.
- [5] A. Bouajjani and R. Mayr. Model checking lossy vector addition systems. In C. Meinel and S. Tison, editors, *Proc. of STACS'99*, number 1563 in Lecture Notes in Computer Science. Springer-Verlag, 1999.
- [6] O. Burkart and J. Esparza. More infinite results. *Electronic Notes in Theoretical Computer Science*, 6, 1996.
- [7] O. Burkart and J. Esparza. More infinite results. *Bulletin of the EATCS 62 (Concurrency Column)*, 1997.
- [8] G. Delzanno, J. Esparza, and A. Podelski. Constraint-based analysis of broadcast protocols. In *Proceedings of CSL '99*, number 1683 in Lecture Notes in Computer Science, pages 50–66.
- [9] J. Esparza. On the decidability of model checking for several mu-calculi and petri nets. In S. Tison, editor, *Proceedings of Trees in Algebra and*

Programming - CAAP '94, 19th International Colloquium 1994, number 787 in Lecture Notes in Computer Science, pages 115–129, 1994.

- [10] J. Esparza. More infinite results. In *Proc. of INFINITY'96*, Research Report MIP-9614, University of Passau, 1996.
- [11] J. Esparza. Decidability of model-checking for infinite-state concurrent systems. *Acta Informatica*, 34:85–107, 1997.
- [12] J. Esparza. Petri nets, commutative context-free grammars, and basic parallel processes. *Fundamenta Informaticae*, 31:13–26, 1997.
- [13] J. Esparza, D. Hansel, P. Rossmanith, and S. Schwoon. Efficient algorithms for model checking pushdown systems. Technical Report TUM-I0002, SFB-Bericht 342/1/00 A, Technische Universität München, Institut für Informatik, February 2000.
- [14] J. Esparza, D. Hansel, P. Rossmanith, and S. Schwoon. Efficient algorithms for model checking pushdown systems. In *Proc. of CAV'2000*, number 1855 in Lecture Notes in Computer Science, pages 232–247. Springer-Verlag, 2000.
- [15] J. Esparza and A. Kiehn. On the model checking problem for branching time logics and basic parallel processes. In *Proc. of CAV'95*, number 939 in Lecture Notes in Computer Science, pages 353–366. Springer-Verlag, 1995.
- [16] J. Esparza and J. Knoop. An automata-theoretic approach to interprocedural dataflow analysis. In W. Thomas, editor, *Proceedings von FOS-SACS'99*, number 1578 in Lecture Notes in Computer Science, pages 14–30, 1999.
- [17] J. Esparza and M. Nielsen. Decidability issues for Petri nets - a survey. *Journal of Informatik Processing and Cybernetics*, 30(3):143–160, 1994.
- [18] J. Esparza and S. Schwoon. A BDD-based model checker for recursive programs. In *Proc. of CAV'01*, number 2102 in Lecture Notes in Computer Science, pages 324–336. Springer-Verlag, 2001.
- [19] P. Jancar and J. Esparza. Deciding finiteness of Petri nets up to bisimulation. SFB-Bericht Nr. 342/23/95A, TU München, 1995.

- [20] P. Jancar and J. Esparza. Deciding finiteness of Petri nets up to bisimulation. In F. Meyer, der Heider, and B. Monien, editors, *Proc. of ICALP'96*, number 1099 in Lecture Notes in Computer Science, pages 478–489. Springer-Verlag, 1996.
- [21] P. Jančar, J. Esparza, and F. Moller. Petri nets and regular behaviours. *Journal of Computer and System Sciences*, 59(3):476–503, 1999.
- [22] P. Jančar, A. Kučera, and R. Mayr. Deciding bisimulation-like equivalences with finite-state processes. Technical Report I9805, TU-München, 1998.
- [23] P. Jančar, A. Kučera, and R. Mayr. Deciding bisimulation-like equivalences with finite-state processes. In *Proc. of ICALP'98*, number 1443 in Lecture Notes in Computer Science. Springer Verlag, 1998.
- [24] A. Kiehn and M. Hennessy. On the decidability of non-interleaving process equivalences. *Fundamenta Informaticae*, 30:23–43, 1997.
- [25] B. König. *Description and Verification of Mobile Processes with Graph Rewriting Techniques*. PhD thesis, Technische Universität München, 1999.
- [26] B. König. Generating type systems for process graphs. In *Proc. of CONCUR '99*, number 1664 in Lecture Notes in Computer Science, pages 352–367. Springer-Verlag, 1999.
- [27] B. König. Analysing input/output-capabilities of mobile processes with a generic type system. In U. Montanari, J. D. P. Rolim, and E. Welzl, editors, *Proceedings of the 27th International Conference on Automata, Languages, and Programming*, number 1853 in Lecture Notes in Computer Science, pages 403–414. Springer-Verlag, July 2000.
- [28] B. König. Analysing input/output-capabilities of mobile processes with a generic type system (extended version). Technical Report TUM-I0009, Technische Universität München, 2000.
- [29] B. König. A general framework for types in graph rewriting. In *Proc. of FST TCS 2000*, number 1974 in Lecture Notes in Computer Science, pages 373–384. Springer-Verlag, 2000.

- [30] B. König. A general framework for types in graph rewriting. Technical Report TUM-I0014, Technische Universität München, 2000.
- [31] B. König. A graph rewriting semantics for the polyadic pi-calculus. In *Workshop on Graph Transformation and Visual Modeling Techniques, Proc. of ICALP Workshops 2000*, pages 451–458. Carleton Scientific, 2000.
- [32] B. König. A graph rewriting semantics for the polyadic pi-calculus (extended version). extended version of [Koe00d], 2000.
- [33] B. König. Hypergraph construction and its application to the compositional modelling of concurrency. In *Proc. of GRATRA 2000: Joint APPLIGRAPH/GETGRATS Workshop on Graph Transformation Systems*, 2000.
- [34] B. König. Hypergraph construction and its application to the compositional modelling of concurrency (extended version). Technical Report TUM-I0003, Technische Universität München, 2000.
- [35] B. König. Hypergraph construction and its application to the static analysis of concurrent systems. *Mathematical Structures in Computer Science*, 12:149–175, 2002.
- [36] B. König and U. Montanari. Observational equivalence for synchronized graph rewriting with mobility. In *Proc. of TACS '01*, number 2215 in *Lecture Notes in Computer Science*, pages 145–164. Springer-Verlag, 2001.
- [37] A. Kučera. On finite representations of infinite-state behaviours. *Information Processing Letters*, 70(1):23–30, 1999.
- [38] A. Kučera and R. Mayr. Simulation preorder on simple process algebras. In J. Wiedermann, P. van Emde Boas, and M. Nielsen, editors, *Proceedings of the 26th International Conference on Automata, Languages, and Programming*, number 1644 in *Lecture Notes in Computer Science*, pages 503–512. Springer-Verlag, July 1999.
- [39] A. Kučera and R. Mayr. Weak bisimilarity with infinite-state systems can be decided in polynomial time. In *Proc. of 10th CONCUR*, number

- 1664 in Lecture Notes in Computer Science, pages 368–382. Springer-Verlag, 1999.
- [40] A. Mader. *Verification of Modal Properties Using Boolean Equation Systems*. PhD thesis, TU München, 1997.
 - [41] R. Mayr. Semantic reachability for simple process algebras. In *Proc. of INFINITY'96*, number Research Report MIP-9614. University of Passau, 1996.
 - [42] R. Mayr. Process rewrite systems. *Electronic Notes in Theoretical Computer Science (ENTCS)*, 7, 1997. Proceedings of Expressiveness in Concurrency (EXPRESS'97).
